

press release

New CD from Pakusch Project Records:

WintherStormer: d.e.s.h.

WintherStormer are releasing their fifth electronic album called «d.e.s.h.» with a concert in Oslo on October 13th 2018.

WintherStormer is sonically adventurous. The sounds themselves saturated, and the canvas of music ever so permeated with expression. Often symphonic in the way that the musical elements are given an organic polyphonic treatment rather than the ordinary song based pop/rock thing with solos in between. Harmonically venturing far beyond the ordinary two-chord minor concept.

d.e.s.h. is an acronym for 'diatonic elaboration of static harmony' and gives a hint of the diversity with which WintherStormer treats the harmonic element around their sequencers.

As the previous albums from WintherStormer, "d.e.s.h." is a daring adventure into every corner of the group's leeway with an energy of fierceness and beauty. Pushing forward as far as possible, and then a little further.

facts on **WintherStormer**

terje winther: synthesizers, sequencers, electronics
erik stormer: synthesizers, sequencers, electronics
atle pakusch gundersen: guitar, electronics, flute, etc.
